Sheet Data

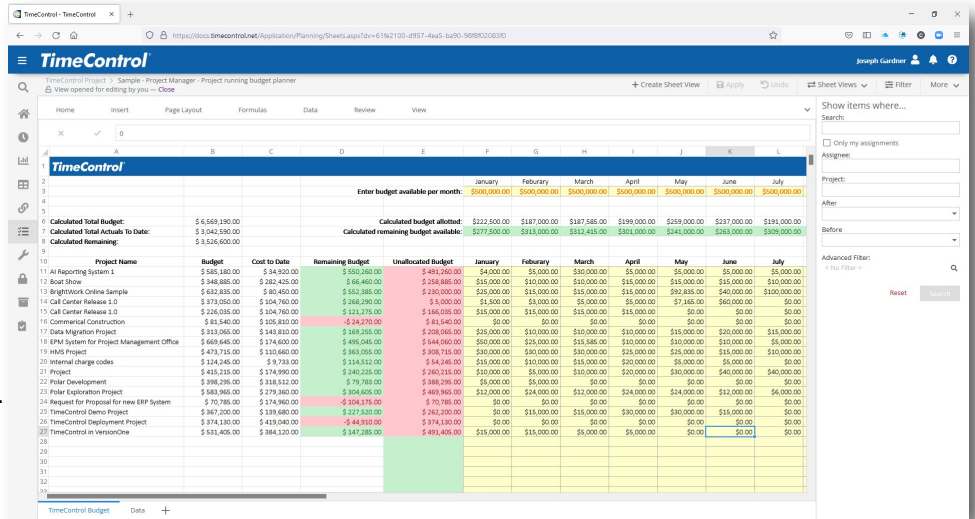

Projects at every level

Project Management has been around a long time and at each level and from each role in the organization we tend to think that project management is the same.

It is not.

Looking at project management strategically from the executive level is very different from looking at tasks tactically from the end user level. This is why TimeControl Project was created.

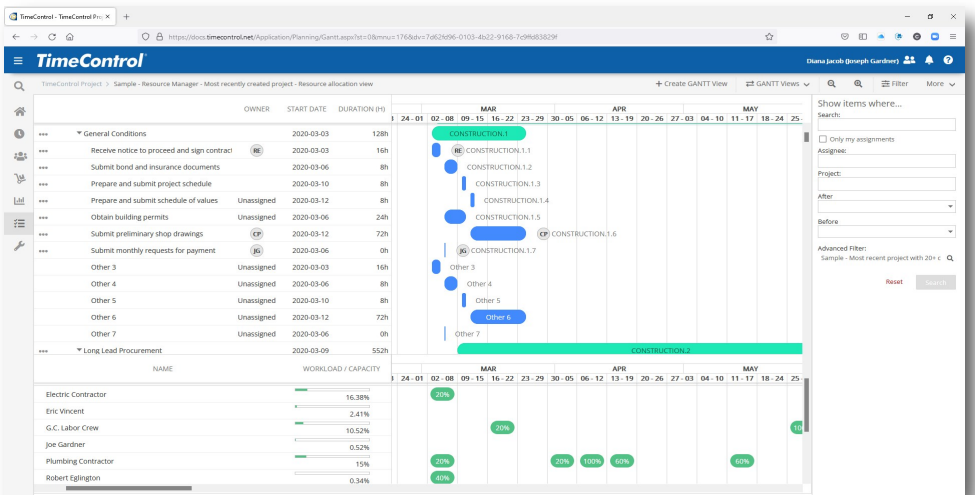

TimeControl Project is a premium version of the powerful and flexible TimeControl Online and TimeControl Industrial Online services. It brings the robust functionality used in timesheets and project actuals and applies it to project planning and project execution. What makes TimeControl Project unique is that it treats each perspective of the organization's project management distinctly. TimeControl Project thinks of project management in Strategic, Operational and Tactical perspectives.

TimeControl Project Sheets Views are spreadsheet views that can take information live from TimeControl and blend it with formulas and data that's entered right into the sheet. Formatting is all under your control. You can even save it as Excel!

Strategic Level

Working as an executive at the Strategic Level project planning and tracking may be most appropriate in a spreadsheet view or a summary barchart schedule. TimeControl brings historic and updated actuals into these views and allows the analysis in a spreadsheet view that includes data from TimeControl timesheets and costing calculations to be included with formulas and data that is either from other sources or manually entered. Now an executive can be looking at projections from actual costs that are from your auditable timesheets and apply them into the future.

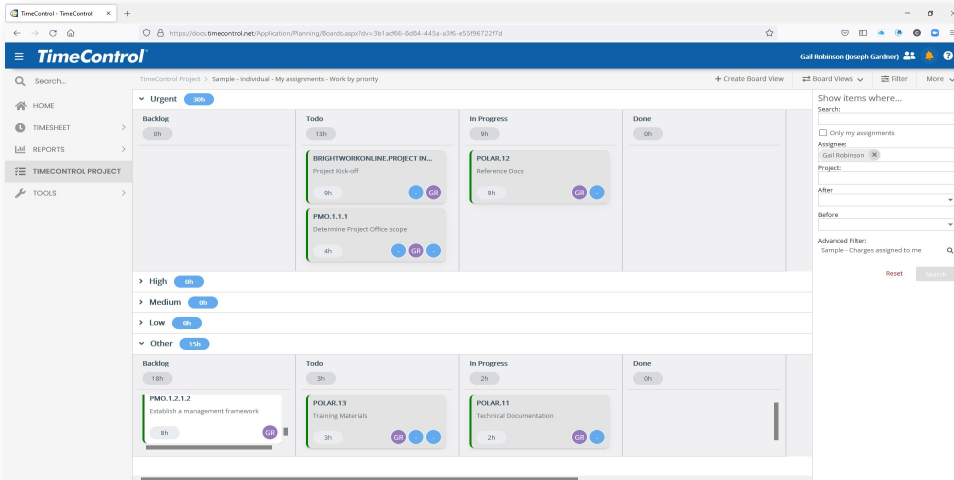

TimeControl Project Gantt Views are customizable barcharts of one or many projects where you control the fields, the display and even resource requirements right on the page.

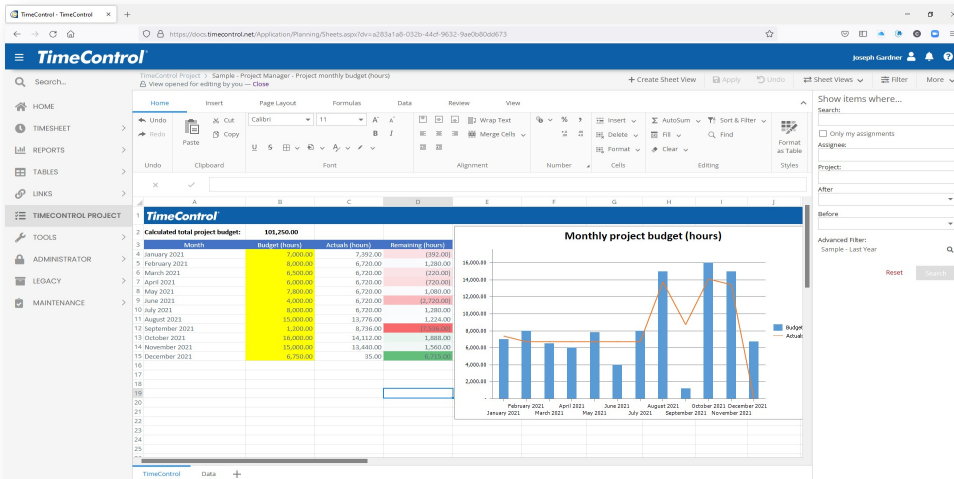

Operational Level

Working as a project manager, resource manager or as the head of a PMO, operational personnel might work in barchart, spreadsheet or agile board types of views as they determine what resource capacity is needed for a particular project or group of projects and authorize that work.

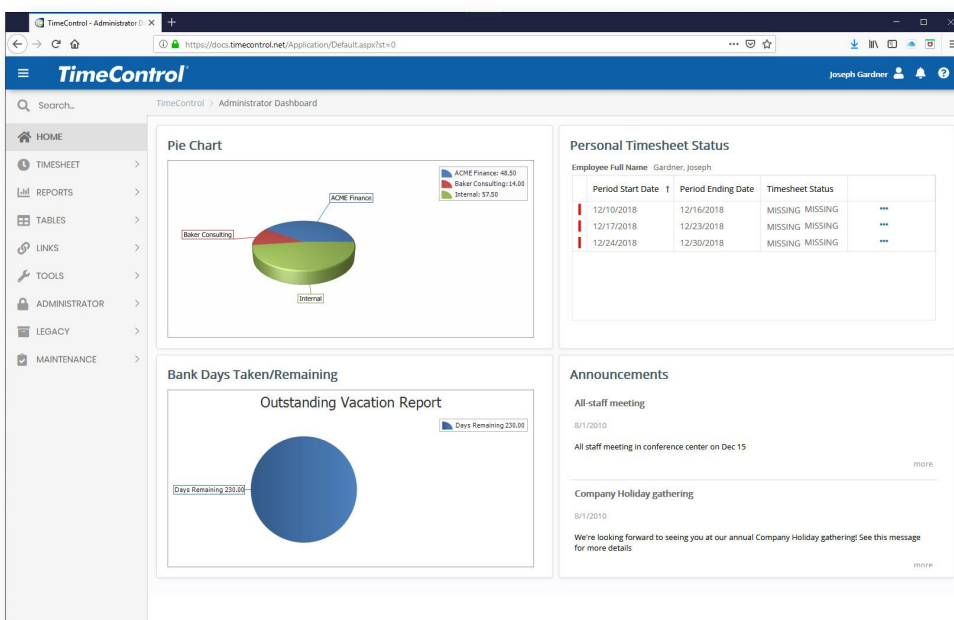

Strategic, Operational, Tactical

TimeControl Project Board Views are incredibly flexible. You can create a standard Kanban type of view or create your own columns, groupings, colors, assignments and Swimlanes.

TimeControl Project includes so many elements of flexibility including the ability to add charts in a Sheets View and the ability to add files or screenshots to a Board View. TimeControl Project has been designed to deliver the right data, analysis and visuals to the people who need them.

TimeControl Project is layered over TimeControl Online which carries all the strengths and flexibility it is known for worldwide.

Tactical Level

Working as a scrum master, team lead or team member at the Tactical Level your interest is measured in the next week or two and your focus is on assigning work and getting it complete at the task level. TimeControl Project facilitates that by making tasks either be part of an auditable timesheet charge or allowing tasks to work completely independently as a more granular level of detail. Tactical Agile Board Views can be configured to be Kanban type, Swimlane type or a customization that is appropriate to the particular Board.

TimeControl is still always there

TimeControl Project is layered over TimeControl Online along with all the power, flexibility and robust functionality it has become famous for since 1994. As a premium version of TimeControl Online and TimeControl Industrial Online, TimeControl project takes advantage of what's there already for timesheet actuals and adds the power of project planning and project execution.

TimeControl Project is a premium version of TimeControl Online, bringing project planning and project execution power to all levels of the organization

Features

TimeControl Project

- TimeControl Project is a premium edition of TimeControl Online or TimeControl Industrial Online
- Includes Sheets, GANTT and Board Views
- Each View is completely customizable and securitized based on the users rights to data and the display they have created. Views are secured by User Profile or by Individual.
- Items on Views can be part of TimeControl's Auditable charge codes or completely independent Tasks.

Easy to use Interface

- Full web-based browser interface with multiple browsers supported
- Scalable user profiles facilitates use for data entry users yet provides full functionality for administrators
- Multilingual
- Unlimited charge codes displayed in simple, hierarchical drop-down lists
- Unlimited free-form notes for each line item and each timesheet
- E-mail-enabled. E-mail messages sent for system notices such as rejected timesheets or missing timesheets
- Scheduleable E-mail notification for missing or unapproved timesheets.
- Predefined timesheets based on resource assignments from the project management system or user preference
- TimeControl can be implemented within a SharePoint interface or a Microsoft Project Web Access interface

Free Mobile App

- **Free TimeControl Mobile App™** for Android and Apple devices

Robust Architecture

- Open database architecture; support for Oracle, Microsoft SQL Server, and MySQL databases
- N-tier architecture makes system

scalable for 10 to 100,000 users

- Unlimited rate codes per employee
- Field-level security. Make any field visible, value read-only, or invisible
- Complete redefinition of every field label
- Complete auditability of timesheet data
- User-defined fields on every table
- Add pop-up data validation for each user-defined field
- Allows charges to be linked to a specific project or project-independent
- Multiple overhead charge types
- Filter charge codes, projects and rates visible to any employee

Approval Process

- HMS's unique *Matrix Approval Process for Labor Actuals™*
- Unlimited automatic Validation Rules are user defineable, flexible and can be applied globally or to any group or even an individual
- Automatic Accrual Rules for banked time
- Unlimited manual validation levels in which each employee can have a unique approval routing
- Project Managers or Account Managers can preview and redistribute hours prior to linking with a project management system or exporting to Finance

Links to Project Management

- Direct integration with popular project management systems such as Microsoft Project and Project Online, Primavera, ARES PRISM, InEight's HD Estimating, UMT360, and DeltekEPPM
- Supports multiple project management systems and multiple versions simultaneously
- Customizable import/export function to interface with virtually any finance or ERP system including SAP, Oracle, PeopleSoft and Microsoft Dynamics
- Interface can be integrated directly into SharePoint

Time-off Request

- **TimeRequest™** module allows vacation, personal or other leave time to be requested
- TimeRequest allows multiple levels of approval
- TimeRequest automatically populates future timesheets with approved time off

Flexible Reporting

- Reporting Wizards allow an unlimited number of reports to be created and saved for later use
- Unlimited levels of data selection, filtering and sorting
- Reports can include text graphics, charts and more
- Reports can be scheduled to be created in the background and emailed automatically
- Drill Down Analyzer views provides instant ad-hoc analysis of data at any level

Expense Reports

- Users can enter non-labor costs on their timesheet
- Unlimited number of expense items per timesheet line item
- Expenses can be tracked back to a project management and/or finance system
- Unlimited number of scanned or photographed attachments per item

Government Compliance

- Complies with requirements for DCAA, European Time Directives, FMLA, the California Wage Laws and Sarbanes-Oxley

Subscribe

- Subscribe to TimeControl Project as part of your Timecontrol Online or TimeControl Industrial Online service.
