INTEGRATED TIMECONTROL AND SHAREPOINT

1. TimeControl's interface can be provisioned right into SharePoint
2. TimeControl can automatically transfer SharePoint tasks or project tasks into the TimeControl Charge Table
3. TimeControl and SharePoint can use the same Active Directory security model
4. TimeControl data can even be displayed in a SharePoint Dashboard

TIMECONTROL AND SHAREPOINT

- The TimeControl Installation Guide gives step-by-step instructions on how to implement TimeControl within SharePoint On Premises. For SharePoint Online, instructions are contained in the Reference Guide.
- TimeControl is not dependent on SharePoint and does not share its database so you can integrate the two when it is convenient to you.
- The link between TimeControl and SharePoint is included with TimeControl, TimeControl Industrial and TimeControl Online.

TIMECONTROL IN SHAREPOINT

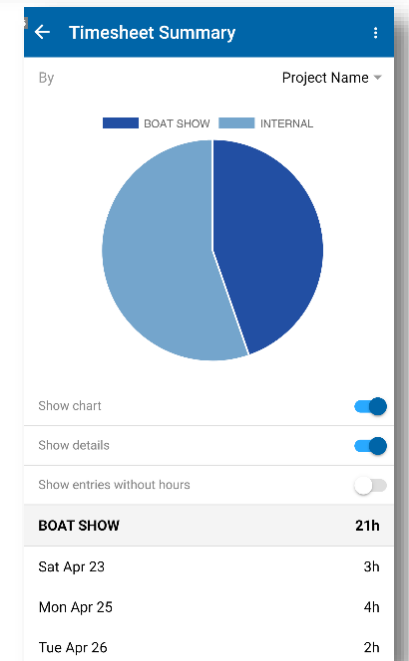

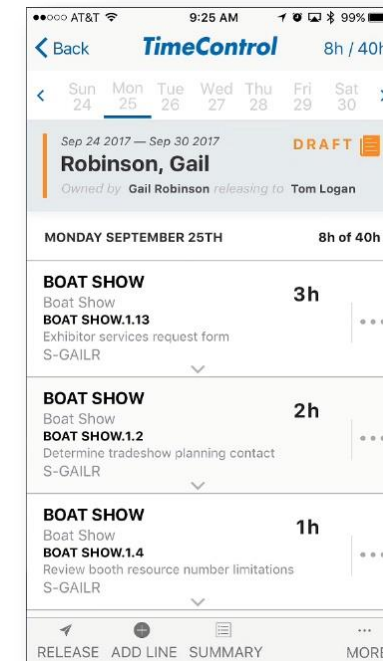

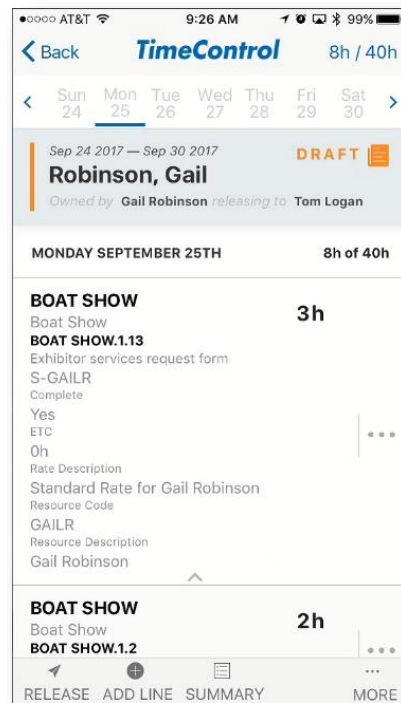

The screenshot displays the TimeControl application within a SharePoint web browser. The browser address bar shows the URL: <https://hmssoftware.sharepoint.com/Project/SitePages/TimeControl.aspx>. The SharePoint interface includes a navigation pane on the left with options like Home, Notebook, Documents, Pages, TimeControl, Site Contents, and Recycle Bin. The main content area features a 'TimeControl' header with a user profile for Joseph Gardner. Below the header is a search bar and a breadcrumb trail: 'TimeControl > Administrator Dashboard'. The dashboard contains several widgets:

- Pie Chart:** A 3D pie chart showing the distribution of time across departments. The legend indicates: ACME Finance (blue), Baker Consulting (red), and Internal (green).
- Personal Timesheet Status:** A table showing the status of timesheet entries for Joseph Gardner.
- Bank Days Taken/Remaining:** A section for tracking bank days.
- Outstanding Vacation Report:** A section for reporting vacation days.
- Announcements:** A section for company-wide announcements.
